Community Disaster Education: Preparing for the Inevitable

Will you be ready the next time we have a fire, mudslide, flood or earthquake? The next time Highway 101 is closed, San Marcos Pass is shutdown or a calamity happens at the airport?

This presentation will help you be aware of and prepare for the natural and human-caused hazards that threaten our area.

You will learn how to better protect yourself, your family or housemates, and property. You will see why you need a “go bag”, an emergency meeting place for family and friends, a plan for your pets and why you need an out of state point of contact. Bring your concerns and leave with your own disaster preparedness plan. To help you get started, we will have a raffle for emergency preparedness supplies.
