Channel Islands National Park: Finding Your Adventure

What is it like to hike, kayak or snorkel at Channel Islands National Park? Imagine bald eagles diving from seaside cliffs to grasp fresh sushi in their talons. Seeing an island fox up close enough to see its whiskers. Paddling deep inside a sea cave with sea lions carving through pellucid, emerald water. Discovering Garibaldi damselfish as orange as a pumpkin. Gazing back at the mainland and wondering how long you can stay. Come and learn how you can find these adventures and more.

Our Channel Islands National Park includes five remarkable islands and their ocean environment, preserving and protecting a wealth of natural and cultural resources. Isolation over thousands of years has created unique animals, plants, and archeological resources found nowhere else on Earth. Some call them the American Galapagos.

Maybe it is time you learned about finding your adventure in the National Park just outside your front door.

Lectures are open to all UCSB employees at no charge. You are welcome to bring your lunch. For more information call John Berberet, M.A., MFT/ASAP at x3318.
